THURSDAY MORNING, AUGUST 20, 1818.

[No. 5310.]

For the prevention and cure of  
BILIOUS AND MALIGNANT FEVERS  
is recommended  
**Hahn's ANTI-BILIOUS PILLS**  
This Medicine has been attended  
with a degree of success highly grateful  
to the inventor's feelings in several parts  
of the West Indies and in the Southern  
and Middle States, &c.

The testimony of a number of persons  
can be adduced, who have reason to be-  
lieve that a timely use of this salutary re-  
medy has, under Providence, preserved  
their lives when in the most alarming cir-  
cumstances.

Facts of this conclusive nature speak  
more in favour of a medicine than col-  
umns of pompous eulogy founded on  
mere assertion.

It is not indeed presumptuously pro-  
posed as an infallible cure, but the inven-  
tor has every possible reason that can re-  
sult from extensive experience for be-  
lieving that a dose of these Pills taken  
once in every two weeks during the pre-  
valence of our bilious fevers, will prove  
an infallible preventive; and further,  
that in the earlier stages of those diseases  
their use will very generally succeed in  
restoring health, and frequently in cases  
esteemed desperate and beyond the pow-  
er of common remedies.

The operation of these pills is perfectly  
mild, so as to be used with safety by per-  
sons in every situation and of every age.  
They are excellently adapted to carry  
off superfluous bile and prevent its mor-  
bid secretions—to restore and amend the  
appetite—to produce a free perspiration  
and thereby prevent colds which are of-  
ten of fatal consequences. A dose never  
fails to remove a cold taken on its first  
appearance: they are celebrated for re-  
moving habitual costiveness—sickness at  
the stomach and severe head-ache—and  
ought to be taken by all persons on a  
change of climate.

They have been found remarkably effi-  
cacious in preventing and curing disor-  
ders attendant on long voyages, and  
should be procured and carefully preserv-  
ed for use by every seaman.

**French Creek Boarding School.**  
The following is published for the infor-  
mation of Parents:

**H**AVING long believed that a School  
on a plan different from most others  
in many respects, would be beneficial to  
society, and apprehending that with all  
its cares, and the responsibility insepara-  
ble from such a concern, I could more  
cheerfully devote my time to the educa-  
tion of children than to any other busi-  
ness, I have concluded to establish a  
**BOARDING SCHOOL FOR GIRLS.**  
With this view I have purchased the  
**FRENCH CREEK FARM**, four miles east  
of the yellow springs, on the Norristown  
and Philadelphia road, situated in Pike-  
land and Vincent townships, Chester  
county, twenty-seven miles from Phila-  
delphia, combining many conveniences  
for the support of such an institution;  
and having let the farm, etc. in a way  
calculated to supply the family with pro-  
visions, I propose to devote my attention,  
with the aid of suitable assistants, to the  
education of the children who may be  
placed under my care.

In selecting the pupils, it is not pro-  
posed to be governed entirely by their ages,  
nor to require that they shall all be mem-  
bers of the religious society of Friends;  
but as the school rules will be very few  
in number and very simple, it is my wish  
that none may be sent contrary to their  
own inclination, nor any one who would  
not be likely to be good examples to the  
other scholars, and treat them with kind-  
ness and affection.

The price for board and tuition will be  
two hundred Dollars per annum, one  
quarter always to be paid in advance—  
no restrictions respecting the kind of  
clothing are intended, nor respecting the  
frequency of the changes that parents  
may require; the washing will be charged  
at the ordinary price per dozen—  
children may be admitted for one quar-  
ter only, and such as are entered for a  
longer period, may nevertheless be re-  
moved at the expiration of any quarter.

The communication with Philadelphia  
will be frequent and easy by stage, and a  
house of entertainment kept by the far-  
mer for the accommodation of persons  
having business at the school.

Reading, Writing, Arithmetic, Eng-  
lish Grammar, Geography and the use  
of Maps and globes, will be taught, to-  
gether with such other branches as the pro-  
gress of the children and experience may  
render expedient. The school to open  
the first of the 5th month next. For fur-  
ther information apply to Edward Sta-  
bler, Alexandria, or to

—Defendants.

**THE** defendant, Thomas W. Peyton,  
not having entered his appearance  
and given security according to the sta-  
tute and the rules of this court; and it  
appearing to the satisfaction of the court  
upon affidavit that the said Thomas W.  
Peyton is not an inhabitant of this dis-  
trict—On motion of the said complain-  
ants by their counsel, it is ordered, That  
the said defendant Thomas W. Peyton do  
appear here on the 1st day of the next  
court, and enter his appearance to the  
suit, and give security for performing the  
decrees of the court; and that the other  
defendant Wm. H. Dandas, does not pay  
away, convey or secrete the debts by him  
owing to, or the estate or effects in his  
hands belonging to the said absent de-  
fendant Thomas W. Peyton, until the  
further order of the court; and that a  
copy of this order be forthwith pub-  
lished for two months successively in  
one of the public newspapers published  
in this county, and that another copy be  
posted at the front door of the courthouse  
of said county.

**PROPOSAL**  
for publishing by subscription, a new work,  
entitled

**THE TREASURY OF HEALTH;**  
OR,

A complete collection of the most valuable  
secrets in medicine, for the cure of all  
diseases, wounds and other accidents to  
which the human body is subject, with  
the method of preparing, and instruc-  
tions for using, the necessary remedies.  
Also, the best preservatives against the  
plague, small pox, and all other kinds of  
contagious diseases.—Discovered after  
much research and experience by the  
most skillful physicians in Europe, and  
employed with the greatest success; and  
unknown till the present time in the United  
States.  
Carefully collected, by a Benevolent Society,  
and faithfully translated from the French,  
and other foreign languages,  
And published for the benefit of humanity,  
BY **LEWIS MERLIN.**

**TO THE PUBLIC.**  
The work which is this day offered  
for public usefulness, ought not to be  
looked upon as those which a desire  
of gain bring forth every day a-  
mong us. This is a rare and precious  
collection of the most valuable secrets  
in medicine, which the most skillful  
physicians have discovered after long  
researches, labor and experience. It is,  
without contradiction, the first of the  
kind that has ever appeared with-  
in the United States of America, and  
a treasure which every head of a fam-  
ily could not too much appreciate;  
as it points out the symptoms of several  
diseases, of which many persons  
are only acquainted with their names;  
2d, the receipt of the quantity and  
quality of the drugs that are made  
use of; 3d, their preparations so care-  
fully described and detailed that the  
least intelligent person cannot be mis-  
taken; and finally the necessary doses  
and the manner of administering them.  
One may rest assured that all in  
this collection is easy to put into  
practice, the expense is trifling be-  
cause all the simples and plants which  
compose the greatest part of the re-  
ceipts it contains, may be found in  
the fields and in the gardens; in a  
word, that it affords the means of curing,  
in a short time, all the diseases  
and evils with which one may be ad-  
dicted, and at a low expense.

It is to a benevolent society we are  
indebted for such a precious treasure.  
Their whole good wish towards suf-  
fering humanity, induced that society  
to spare neither pains, care nor ex-  
pense in obtaining from all parts  
of the globe, and to give in one and only  
collection, a valuable and complete se-  
lection of receipts for the cure of all  
diseases with which the human body  
is every day afflicted, which their re-  
nowned virtues, the repeated experi-  
ence that has been made of them, e-  
ven on patients who had been given  
up by their physicians, and the cures  
resulting from them, have caused them  
to be adopted as sovereign and infalli-  
ble remedies.

Amongst the great number of dis-  
eases that have been cured by these  
inestimable secrets, we shall only name  
some of them, of which the foreign  
journals and American newspapers  
have borne the most authenticated tes-  
timony, such as apoplexy, asthma, bil-  
ious, windy and nephretic colic,  
consumption of lungs, debility, dysen-  
tery, diarrhoea; dropsy in the breast,  
in the brain, compound dropsy, anar-  
sarque et ascites, epilepsy, diseases of  
the eyes, intermittent, tertian, quar-  
tan, continual and inflammatory fe-  
vers, malignant, spotted and scarlet  
fevers, lues (so fatal to children), in-  
flammation of the bowels, of the liver  
and lungs, gangrene, itch, jaundice,  
fits, hooping-cough, lethargy, leprosy,  
rheumatism, pulmonary, scurvy,  
swellings, sore throat, worms, tape-  
worm, complaints of the bowels,  
looseness or bloody flux, folty or mad-  
ness originated after a sequel of dis-  
ease, or through an immoderate use  
of spirituous liquors, cold and sciatic  
gout, gravel, gonorrhoea, hy-  
drophobia, bite of venomous animals,  
hemorrhagy, palpitation of the heart,  
stone, &c. &c.

This precious collection contains  
likewise a great number of receipts  
for preparing several kinds of bal-  
sams, ointment or salves, with the  
manner of using them, and the ef-  
fects of which are so surprising, that  
they cure in a very short time, the  
cancers, without the assistance of any  
operation; the king's evil, tetter or  
ring's worm, wens; all sorts of cuts,  
wounds, however large and deep they  
may be, both inward and outward he-  
morroids, all pains and swellings a-

rising from rheumatism, all kinds of  
burns, all catarrhs of the eyes, even  
those that deprive of the sight; all  
sores that come on women's breasts;  
all kinds of sore legs and ulcers, how-  
ever old they may be; chancre, bub-  
oes, and other venereal disorders;  
they join the nerves again, when they  
have been cut or broken in any man-  
ner whatever; they strengthen weak  
nerves and prevent the palsy when-  
ever one is threatened with it; they  
draw out broken bones and all other  
foreign bodies that may be in sores or  
wounds; in short, these ointments or  
salves do possess such a virtue against  
the gangrene, that many persons be-  
ing at the point of having their legs,  
hands or fingers cut off, have been en-  
tirely cured by the application of these  
ointments alone.

In this interesting work will be al-  
so found the inestimable receipt of the  
grand preventive against the plague,  
pestilential, spotted and other fevers,  
small pox, and all kinds of contagious  
diseases; their preparations with the  
manner of making use of them both  
inwardly and outwardly, as well to  
preserve ourselves against the conta-  
gion as to be cured whenever one is  
afflicted with them; and wonderful  
and most valuable secrets in medicine  
—always employed with success, and  
never failed to cure in epidemic and  
contagious diseases, and unknown to  
the present time in the United States  
of America.

In short, the famous and renowned  
syrup of long life, or the great pre-  
servator of health, whose so extraordi-  
nary virtues have drawn the attention  
of a great number of physicians, al-  
though the desire of gain has endeav-  
ored to counterfeit or imitate it, but  
always without success. That receipt  
so very simple, so very easy to pre-  
pare, and of a good taste, was given  
by an old gentleman of one hundred  
and thirty-two years of age, who be-  
gan to make use of it at the age of 60  
without his having ever experienced  
the least inconvenience. The good ef-  
fects which this simple receipt has al-  
ways produced on the persons who  
have made use of it are so well known  
that no more need to be said on that  
subject; and although this work con-  
tains a great number more of other  
receipts and other matters not less in-  
teresting for the human body, we shall  
not dwell any longer on the benefits  
arising to the public out of this pre-  
cious collection; because it is only by  
putting what is taught in it into prac-  
tice, that the public will be convinced  
of the truth that there is no quackery  
nor deception in all that has been said,  
but many truths which could not be  
too much appreciated.

We recommend this work to heads  
of families, more particularly to those  
who reside in the country, who owing  
to their situation are often deprived of  
medical assistance in cases of the most  
urgent necessity; it is likewise of the  
greatest utility to those who through  
their profession are obliged to visit  
the sick; as also to the ministers and  
pastors of congregations, who in their  
situation are likewise obliged to afford  
relief to suffering humanity; in short,  
it could not be too much recom-  
mended to captains, masters of vessels,  
seafaring men and other travellers,  
who frequent warm climates, as well  
as to those persons who have a desire  
to preserve their own health; so much  
the more, as (we repeat it again) that  
all therein contained is easy to put in  
practice, and the expense is small.

As the publication of this work is  
not an object of a pecuniary specula-  
tion, but the welfare of humanity gen-  
erally, we have endeavored, as well  
as the expense has permitted, to fix  
the price of subscription as low as pos-  
sible, in order that the poor as well as  
the rich may be able to obtain it, and  
experience its good effects principal-  
ly in warm seasons, and in cases of  
contagious diseases.

**CONDITIONS.**  
To render this work more portable, and  
comply with the wishes of many persons,  
it will form a large volume in 12mo. to be  
printed on good paper and good type, and  
delivered neatly bound and lettered to sub-  
scribers at 150 cents, to non-subscribers,  
the price will be enhanced to two dollars,  
and the profit arising from it will be for  
the benefit of the poor.

As soon as the subscription will be suf-  
ficient to defray the expense of printing,  
the work will be put to press and distributed  
as soon as circumstances will permit.

To prevent counterfeiting this work, the  
copy right has been secured according to  
law, and moreover each copy shall be sig-  
ned by the person who has the sole direction  
of superintending the publication of it.

THE CENTERIAD:

Or, Another strain for Newspaper Editors.  
Much fun is made of captain Symmes,  
For undertaking divers whims;  
And chiefly, that he means to venture  
An expedition to earth's centre.  
Some wag too, are a poking blarney  
At good Lord Cochran, for the plan he  
Has devised to find the Pole,  
And peep into our Captain's Hole.  
Let such ungrateful people go;  
Among such fools it's always so.  
The latent tenants of the manger  
Won't eat themselves, nor let a stranger.  
Devoid of all pretence to merit,  
They can't be men of public spirit;  
And none can move a public work,  
But they are at him a la Turk.  
I rather guess these waggish gentry  
Will find, in less than half a cent'ry,  
That what they now so much bespatter,  
Is, in the end, no laughing matter.  
Whence come these snakes, in part or  
whole,  
Except from Symmes' arctic pole?  
For ages, as we now discover,  
This orifice was frozen over;  
But since, in these our latter days,  
The ice gives way to solar rays,  
Who knows, we say, but these great elves  
Have now come out to sun themselves?  
If so, to guess what will be next,  
The muse is very much perplexed;  
And counsels supercilious folks,  
'Tis best they should reserve their jokes;  
For who can tell but next may come  
Some monster of a sea-few-lum;  
And make a tour along the lea,  
As Kraken does along the sea.  
And, if their snakes within the earth,  
Are of so terrible a birth,  
That, by the whisking of their tails,  
They easily can lick our whales,  
How would these duckling mortals dare  
Should they send out a central bear?  
And, by the way, what man can tell  
That all our mammoth's do not dwell  
Within the precincts of earth's shell?  
And now and then come out to serve us,  
And take a turn about the surface?

FOR THE GAZETTE.

"Jesus said, I thank thee O Father, Lord  
of heaven and earth, because thou hast hid  
these things from the wise and prudent, and  
hast revealed them unto babes; even so fa-  
ther, for so it seemed good in thy sight."  
Matt. 11, 25, 26.

The true gospel ministers of Jesus Christ  
are greatly encouraged in their ministerial  
labors, knowing that they serve that gra-  
cious God, who hath declared "My word  
shall not return unto me void; but it shall  
accomplish that which I please. It shall  
prosper in the thing wherunto I sent it;"  
Isaiah 55, 11. To some the gospel is a  
savour of life unto life; to others, of death  
unto death. To some, Jesus is revealed  
and made known as the way, the truth, and  
the life; to others, the gospel remains as a  
book sealed; they see not the mysteries of  
divine love; they see not Jesus held forth  
as the great and sole atonement for sin.—  
But in both the former and the latter case,  
the gospel ministers "are unto God a sweet  
savour of Christ in them that are saved, and  
in them that perish." 2 Cor. 2, 15.

What shall we say then to these things?  
Shall we cavil against the sovereign dispensa-  
tions of God, or arraign him at the bar of  
our weak and carnal judgments? Shall the  
potsherds of earth contend with the great  
Jehovah, and say what dost thou? Shall  
the pride of human reason and the rebellion  
of our corrupt nature, dare to reply to the  
work of Jehovah; with "I cannot believe  
it to be just and righteous, that God should  
have predestined some to the adoption of  
children, by Jesus Christ, according to the  
good pleasure of his will." I must and will,  
say they, contend against such doctrine.—  
But weak and puny mortals; who art thou  
that contendest with God? Knowest thou  
not that he could dash thee to pieces as a  
potter's vessel? Who art thou that pre-  
ferrest an arm of flesh to God? Is it not  
written, "cursed is he that trusteth in an  
arm of flesh." St. Paul says, in reply to  
such God dishonoring thoughts, "nay, but  
O man, who art thou that repliest against  
God." It is evident such professors walk  
not humbly before God. They possess not  
the mind of the meek and holy Jesus. To  
do his father's will was his joy; the purpo-  
ses of Jehovah were his delight. Even  
so, father, for so it seemed good in thy  
sight, is the blessed example of filial obe-  
dience that he has left behind him, and has  
more force than any other reason that we  
can assign, for God's dealings in providence  
and grace. The office of the holy spirit is  
to testify of Jesus, and to apply the ever  
blessed gospel to those chosen in Christ,  
before the foundation of the world.

UPPER CANADA.

We have accounts from Upper Canada  
up to the 30th ult. Town meetings con-  
tinued to be held. Violent opposition is ma-  
nifested by the magistracy of the province,  
and Mr. Gourlay, the champion of reform,  
has been twice violently assaulted, and at  
one time severely beaten.

BAPTIST THEOLOGICAL SEMINARY.

The Baptist Board of Foreign Missions,  
have just concluded their session in New-  
York. The object of their deliberations  
has been the establishment of a Theologi-  
cal Seminary, on an extensive scale. They  
are calling in the aid of their churches ge-  
nerally throughout the Union, and have  
appointed several ministers to travel thro'  
the states, and obtain subscriptions and col-  
lections. The institution will go into par-  
tial operation during the present fall and  
winter. In April next it is expected that  
it will be fully organized. [N. Y. paper.

The exertions of the pious and benevo-  
lent, seem every where to be directed to  
the improvement and amelioration of the  
condition of man.—In this public-spirited  
metropolis, a project has lately been set on  
foot to build a marine church. At Boston,  
we perceive, measures have recently been  
adopted to proclaim the gospel, as "glad  
tidings of good things," to the sons of the  
wave. The place of worship is stated in  
the Boston papers, to be over the center  
arch of the new stores on Central wharf.—  
Seats are provided for captains and mates,  
and every mariner has an invitation to wor-  
ship at the hours appointed.

FEMALE INTREPIDITY.

At one o'clock on Saturday afternoon, a  
female who attends the Philadelphia mar-  
ket with vegetables, and whose residence  
is in Passyunk township, was returning  
home in her cart. At the intersection of  
Third and Dock streets, the horse by some  
means slipped the bridle, set off at full  
speed, (the woman still keeping fast hold  
of the lines, although she had no control of  
the animal) and ran down Dock-street,  
nearly to where it is intersected by Little  
Dock-street, when he was fortunately over-  
taken by Mr. West, a colored man, and the  
woman relieved from her perilous situa-  
tion.

The woman unquestionably owed her  
safety to her presence of mind, in remain-  
ing firm in her seat during the whole time.  
The occurrence affords another strong proof,  
that it is much safer, on such occasions, to  
remain in the vehicle, than to attempt es-  
cape by leaping from it, which, in almost  
every instance, is attended with injurious,  
if not fatal consequences. The animal is  
said to be remarkably docile. [Phil. Cent.

A writer who signs himself a Traveller,  
in the Pittsburgh Pennsylvania Gazette, re-  
marks that "the trade of the western coun-  
try must unavoidably center at N. York."  
The reasons which he gives in support of  
his opinions, are, that when the great west-  
ern canal shall be completed, the price of  
transportation from the city of New-York to  
Buffalo, on lake Erie, will not exceed  
30 cents per hundred weight, a rate so low  
that the Philadelphians can never think of  
rivaling, even though they could persuade  
the Alleghany mountains to open them a  
passage through its bowels; and every  
other obstacle to a road should be removed.  
The same writer asserts that 60 tons bur-  
then will traverse 60 miles of the New-  
York canal before another winter sets in.

HUMAN SUFFERING.

A paper printed at Indiana in the state of  
Pennsylvania, relates the case of a Mr.  
Shepley, who was encamped in the  
woods for the purpose of hunting deer, but  
unfortunately strayed from his companions,  
and was eleven days and nights in the  
wilderness. When found, his appearance  
"was wretched and frightful in the ex-  
treme—he was crawling along, with a stick  
in each hand, in a state of mental derange-  
ment; his body and limbs entirely destitute  
of clothing, except a small remnant of his  
shirt, which hung about his shoulders, and  
had neither hat, shoes, or stockings on—  
his feet and head were dreadfully lacerated  
and swollen. From his great debility of  
body, having been in the wilderness eleven  
days and nights, without any subsistence  
but that obtained from berries, he could  
not have survived much longer." A number  
of persons had been constantly on the  
search during that time.

THEATRE.

We are happy to learn that Mr. Cald-  
well's company will commence their season  
in this town, on Monday evening. The  
encouragement they have met with in Ra-  
leigh, proves that the company possesses  
talent, and that it is managed with ability.  
Mr. C. having procured a lease of the  
Newbern theatre, as well as that of Ra-  
leigh and Fayetteville, purposes, we learn,

to bring on annually a respectable compa-  
ny, and to perform two or three months in  
North-Carolina. We trust that the pa-  
tronage received by him will render the  
undertaking profitable, and we are sure  
our citizens will step forward with alac-  
rity to secure to themselves the establishment  
of a theatre among them on a regular footing.  
We learn that Mrs. Russell, a fine singer,  
joins the company here with her husband.

SACKET'S HARBOR.

The Sacket's Harbor Gazette contains a  
report of the trustees of the village, from  
which the following is extracted. The re-  
port is signed by Justin Butterfield, presi-  
dent.

"At the commencement of peace, this  
village contained the accumulated filth and  
rubbish of a three years' war; its exhalations  
were as offensive as its general ap-  
pearance was disgusting; but since that  
period it has undergone an entire revolu-  
tion, its inhabitants have developed their  
resources, and exhibited a spirit of enter-  
prize, liberality and improvements, that  
would challenge a rival with any village in  
the state. The streets have been cleaned  
and flagged, the roads improved; the chaum-  
nies built during the war demolished, and  
many convenient and elegant buildings  
erected in their stead. The gospel is sup-  
ported, a church organized, and schools  
established. Sacket's Harbor now exhibits  
a neat, thrifty and flourishing village—a  
military and naval post and depot—a port  
of entry and delivery;—adorned and ren-  
dered interesting, by its military works  
and naval ships, it is now resorted to for  
the gratification of curiosity and the enjoy-  
ment of pleasure;—a market for the far-  
mer, and a metropolis for the transaction  
of commercial and mercantile business, in  
this section of the country."

From the Baltimore American.

The anniversary of the birth day of Na-  
poleon, (15th of August) was celebrated at  
the Union Coffee House, in Water-street,  
by those brave French officers who have  
remained faithful to him. A number of  
toasts were drank on the occasion, among  
which were the following:

France, our country—May she gain again  
the great man, by whom she was once  
commanded, and revenge herself of the in-  
sults which she has received.

Napoleon the Great—May the last drop  
of our blood serve to re-establish him to the  
French people.

Napoleon the Second, his son, and the  
hope of France.

Eugene Napoleon, a great captain.

Maria Louisa, wife of Napoleon.

The brave generals Drouot, Bertrand,

Cambrone, and all other superior officers  
who have been faithful to their oath.

The memory of General Washington—

Great by his virtues and his actions.

The President of the United States.

The brave citizens of this country, who  
so generously gave an asylum to the un-  
happy Frenchmen obliged to fly from the  
destroying hand of the family of the Bour-  
bons.

Our companions in arms who are groan-  
ing under the irons of tyrants.

Destruction to the infamous inventor of  
the infernal machine.

Mortal hatred to the British government,  
which, by its gold and its intrigue, gained  
the sovereignty of Europe, and caused the  
loss of our dear country.

General La Fayette.

The brave British officers who saved La-  
Fayette from the scaffold.

Lord Holland, one of the most zealous  
patriots.

Some patriotic discourses were deliver-  
ed, and each toast was followed by a song  
of patriotism and energy.

The dinner was finished by giving the  
following toast:

Our brethren Freemasons extended over  
the two hemispheres.

SINGULARITIES IN NATURE.

1. The shark fish which swallows with-  
out distinction every thing that drops from  
a ship into the sea, abhors the flesh of fowl.  
When a dead fowl is thrown from a ship into  
the sea, the noise brings the shark to the  
spot, but on discovering it to be a fowl, he  
immediately retires without touching it,  
from which circumstance the sailors say,  
"the shark flies from the feather."

2. In the Royal Cabinet at Paris, there  
are arrows whose points are impregnated  
with the juice of a plant so venomous, that  
though exposed to the air for many years,  
they can with the slightest puncture destroy  
the most robust of animals in a few minutes.  
The blood of the creature, be the wound  
ever so trifling, instantly congeals. But  
if the patient at the same instant, is made to  
swallow a small quantity of sugar, the cir-  
culation is immediately restored. Both the  
poison and the antidote were discovered by  
the savages who inhabit the banks of the  
Amazon.

3. Although salt is employed to preserve  
animal food from putrefaction, yet a bottle  
or cask of sea water, becomes putrid much

sooner than a bottle or cask of fresh water,  
and sea-water, although salt to the taste,  
takes out salt, or deprives bodies of a salt-  
ish taste, much better than fresh water.—  
This fact is well known to all sailors, who  
always employ sea-water in preference to  
fresh water, for the purpose of freshening  
their salt provisions.

4. The firing or burning of forests in the  
neighborhood of the sea, or on large rivers,  
is said invariably to produce the effect of  
driving away the fish. Denis, in his natu-  
ral history of North America, tells us that  
the cod, which in shoals used to frequent  
the coast of the Island of Miscon, disap-  
peared in 1689, because, in the year pre-  
ceding, the forests had been destroyed by a  
conflagration. He remarks that the same  
cause had produced the same effect in dif-  
ferent places.

LETTERS FROM ASIA.

Extract from a series of letters, written by  
an American gentleman while in Asia, to  
his friend in Boston. The writer unfor-  
tunately died by the plague, on his pas-  
sage from Alexandria, in Egypt, to Con-  
stantinople, in a Grecian vessel.

[Boston Patriot.

[No. 4.]

At day light we doubled Cape Carabour-  
na, and ran down the bay of Smyrna with  
a strong sea breeze, and about noon an-  
chored off the town.

On both sides from the Cape, the country  
is highly cultivated; olive and fig trees, with  
vineyards on the rising ground, render it  
extremely beautiful: but on approaching  
the port, the mind is filled with painful re-  
flections from observing the immense num-  
bers of cypress with which the Turkish bur-  
ying grounds are filled—giving melan-  
choly proofs of the dreadful ravage of that  
Eastern scourge, the plague.

Smyrna, situated at the bottom of a deep  
bay, surrounded on three sides by lofty  
mountains, at first sight appears like a large  
Indian village—the roofs of the buildings,  
which are generally composed of wood, be-  
ing painted red, and so very compact, that  
it is impossible to distinguish one from an-  
other; but a stranger can form no idea as to  
its size, it being located in a valley, ren-  
dering the nearest and most distant parts  
only visible. Frank-street, however, with  
the spires of the mosques, giving it some-  
thing the appearance of a city.

We had anticipated the tedious cere-  
mony of being visited by custom-house and  
pratique officers, but in this we were hap-  
pily deceived, as the Turks give themselves  
no trouble on the arrival of Christian ves-  
sels, and one might lie here from the be-  
ginning to the end of the year, without any  
molestation, or expense from the govern-  
ment with the exception of about three shil-  
lings sterling, demanded at the castle on  
leaving the harbour.

After viewing the shore through our glass-  
es for the space of an hour, to observe if we  
could discover any thing like the effects of  
the plague—of which our Greek pilot had  
given a most dismal description, we were  
boarded from a chuyk, as they term the  
Grecian boats, by a man dressed in long  
robes, with a bell round his body, and a  
tulnak on his head, who addressing us in  
French, wished to know to whom our ves-  
sel was consigned. This personage, who I  
afterwards learned was a broker, gave us  
the pleasing information, that not more  
than twenty Christians were daily swept  
off by the prevailing pestilence.

The harbor was full of Turkish and  
Christian vessels from all parts of Europe:  
the crews of the former were amusing  
themselves by firing salutes in honor of  
some of their saints, having as many, al-  
tho' under different names, as can be enu-  
merated in the Catholic calendar, or that of  
their subjects and neighbours, the Greeks  
and Russians.

Being assured by the broker that no dan-  
ger whatever existed from landing, we pre-  
ferred to leave the vessel in our own boat,  
not wishing to trust ourselves in that long-  
sided, from the filthy appearance of the  
crew, and the filthy appearance of the coats  
that they might not interfere with any of  
the natives while passing through the streets  
we reached the quay, and for the first time  
I placed my feet on the shores of Asia.

LATEST FROM ENGLAND.  
The fine fast-sailing ship Triton, Capt.  
Holcomb, arrived here yesterday afternoon,  
in 37 days from Liverpool, with a full cargo  
of dry goods, to 60 consignees. We are  
indebted to Messrs. Hooper and Toplis for  
London papers of the 4th July, and Liver-  
pool of the 6th.

The elections in England were proceed-  
ing with unusual warmth, and even with  
violence. Mr. Hunt had been attacked at  
the hustings by a Mr. Dowling, armed with  
a horse-whip. Dowling was attacked in  
turn by a deaf and dumb brother of Hunt,  
who appears to have inflicted some heavy  
blows on him.

The Liverpool Advertiser of the 4th July,  
says—"Accounts from various places con-  
tinue to state an increase in the return of  
opposition members to the members of the  
new Parliament. The whole amount of  
the accessions to the anti-ministerial ranks,  
is estimated at about 35, though that num-  
ber is thought by some to be over-rated."

A passenger confirms the above, and  
states that London will send three members  
in opposition, and one for government—  
Westminster 2 opposition—the Borough 2  
opposition—Liverpool 2 in favor of govern-  
ment.

The London Courier of the 1st July,  
speaking of the execution of ARBUTHNOT  
and ARBUTHNOT, says—"If they were really  
guilty of the crime with which they stood  
accused, their fate was such as the law of  
nations warrants. But as to the idea of

their being emissaries to the British go-  
vernment, it is too ridiculous a supposition  
to be seriously refuted."

Valuable Estate for Sale.  
UNDER the authority of a decree from  
the Equity Court of Prince George's  
county, the subscriber will on Wednesday  
the 25th day of September next, offer at pub-  
lic sale, at the house of Isidore Hardy, in  
Piscataway, a most valuable property, the

Estate of George R. Leiper,  
Esq. deceased, so well known by the name  
of MONTPELIER—about 2 miles from  
Piscataway, 9 miles from Alexandria, and  
16 from Washington city.

This farm, which contains rather more  
than 600 acres, is truly valuable. The soil  
is fertile and highly susceptible of improve-  
ment by the use of clover and plaster. The  
buildings are good and commodious, and  
the site of the Mansion, in beauty  
of perspective and salubrity of air,  
is excelled by few on Potomac ri-  
ver. To be entitled to appreciate  
fully the elegance of the situation and all  
the advantages which result to the posses-  
sor of this valuable estate, it is only neces-  
sary that it should be viewed, which may be  
done, and every necessary information ob-  
tained, by application to the subscriber, or  
Mr. Aquila Baden, the present manager of  
the farm.

The terms of sale are that the purchaser  
shall pay one-third in ready money, and  
the residue in two equal annual payments,  
with interest from the day of sale, to be se-  
cured by bond with approved security, and  
on the ratification of the sale by the court,  
and the payment of the whole purchase  
money with the interest thereon due, and  
not before, the trustee will execute to the  
purchaser a deed in the terms of the decree.  
The purchaser on complying with the terms  
of sale, will have the liberty of seeding a  
crop of winter grain.

THOMAS MUNDELL, Trustee.

Valuable Estate for Sale.  
UNDER the authority of a decree from  
the Equity Court of Prince George's  
county, the subscriber will on Wednesday  
the 23d day of September next, offer at public  
sale, at the house of Isidore Hardy, in  
Piscataway, a most valuable property, the

Estate of George R. Leiper,  
Esq., deceased, so well known by the name  
of MONTPELIER—about 2 miles from  
Piscataway, 9 miles from Alexandria, and  
16 from Washington city.  
This farm, which contains rather more  
than 600 acres, is truly valuable. The soil  
is fertile and highly susceptible of improve-  
ment by the use of clover and plaster. The  
buildings are good and commodious, and  
the site of the Mansion, in beauty  
of perspective and salubrity of air,  
is excelled by few on Potomac ri-  
ver. To be enabled to appreciate  
fully the elegance of the situation and all  
the advantages which result to the posses-  
sor of this valuable estate, it is only neces-  
sary that it should be viewed, which may be  
done, and every necessary information ob-  
tained, by application to the subscriber, or  
Mr. Aquilla Baden, the present manager of  
the farm.  
The terms of sale are that the purchaser  
shall pay one-third in ready money, and  
the residue in two equal annual payments,  
with interest from the day of sale, to be se-  
cured by bond with approved security, and  
on the ratification of the sale by the court,  
and the payment of the whole purchase  
money with the interest thereon due, and  
not before, the trustee will execute to the  
purchaser a deed in the terms of the decree.  
The purchaser complying with the terms  
of sale, will have the liberty of seeding a  
crop of winter grain.

will exchange all kinds of Bank Notes on  
the most reasonable terms.—All persons  
who may have notes on the banks of North  
Carolina, South Carolina and Georgia,  
would do well to call on him, as he is  
largely in the purchase of that kind of mo-  
ney, and will take it on the most reasona-  
ble terms.—Persons travelling to the West-  
ern Country may at all times get the Bank  
Notes of the Western Banks at a fair dis-  
count, by calling at his Office. For the in-  
formation of all persons throughout the U.  
States, R. Riggs makes it known, that all  
of the Banks of the District of Columbia  
pay their notes on demand in specie; and  
it would be much to the advantage of the  
merchants, and trading to the South and  
west, to encourage the circulation of the  
Notes of the Banks of Georgetown, Wash-  
ington and Alexandria, as it will at all  
times answer for remittances to the large  
commercial and Atlantic towns;—all per-  
sons emigrating or travelling to the west-  
ward should be very particular and take  
the Notes of the Banks of the District of  
Columbia, as they will find them the most  
current, there being no counterfeits on the  
District Banks. The Merchants' Bank of  
Alexandria has long since failed—all per-  
sons should be on their guard, as they will  
be imposed on.

opened a house of entertainment at his new  
building, on the road leading from George-

The house and furniture are new and ele-

have been provided for the accommodation  
of either parties of pleasure or persons on  
business. There is an excellent spring of  
water on the place, excellent perhaps by  
none in the state of Virginia. The dis-

ticipates a share of public patronage, which  
he hopes his assiduity to business will just-

The Improved Patent Plough.  
THE expensive force necessary for  
ploughing in the common way, has  
been long known and lamented by farmers.  
Many attempts have been made to obviate  
that inconvenience, by the construction of  
a plough on Mechanical principles, and pa-  
tents have been granted to applicants who  
profess to have improved on that agricul-  
tural implement. These improvements are  
now before the public, the proper arbiters  
in such cases, who will approve or condemn  
according to the merits or demerits of the  
performance.  
I, also, have become a candidate for public  
patronage, and shall attempt to explain  
and give reasons to show at least some ad-  
vantages which I think my plough possesses  
over any other now in use.  
For its durability and simplicity of  
construction, its first excellence, no plough now  
in use surpasses it—but its chief advan-  
tages lie in the ease with which it breaks and  
inverts the soil, and will plough in clover  
or grass land of any kind without being  
clogged or choked. These properties  
arise from the mechanical principles on  
which it is formed. The wedge is said to  
possess the requisite properties for breaking  
and raising the soil with the least applica-  
ble force. This plough is so formed as to  
form a wedge with the mould-board, which  
raises the earth gradually, to the greatest  
perpendicular height, when by a regular  
turn of the mould-board it is inverted, ren-  
dering the pressure inconsiderable, and  
consequently the force necessary to draw it  
proportionably small. The beam is made  
of iron or wood, and has a considerable  
curve, which permits all vegetable matter  
to pass off. I would recommend the iron  
beam, as it has several advantages over the  
wood, and the difference of expense small.  
I have thought it a duty to my fellow ci-  
tizens to publish a few lines of instruction  
to facilitate the mode of using and repair-  
ing the same. Before the plough is used,  
the mould-board should be scoured with  
free stone or a well burnt brick and water  
until it is perfectly smooth. The horses  
should draw by a double or treble tree,  
which is confined to the clevis or beam by  
an open ring. The point and share should  
be laid with steel when necessary; the lat-  
ter must be kept level with the bar, and the  
point inclined a little down. If this be  
well attended to by the good husbandman,  
he will be able to eat the "fatted calf,"  
when the indolent will sink into want.  
These ploughs will be furnished at my  
shop in this County, and in Alexandria by  
James Atkinson, near Poston's tavern, Pey-  
ton street.

Ten Dollars Reward.  
WILL be given by the subscriber, liv-  
ing near Haymarket, in Princewill-  
iam County, for the recovery of a horse,  
which strayed or was stolen from her farm,  
on the night of the 13th of April last. The  
above named horse is 5 or 6 years old, of  
blood bay color, 15 hands high, long with  
tail, rubbed on the left side by the harness  
of the cart or wagon, in either of which he  
had been used to draw; he has no white  
marks or brand, and the hair on the top of  
the head between the ears is worn short.

Fifty Dollars Reward.  
RAN away from the subscriber, on the  
3d inst. Negro JEM, about 5 feet  
5 inches high, 25 or 28 years of age, stout  
and well made, except that he is perhaps a  
little knockkneed; his complexion dark,  
has a large scar on the upper lip, occasioned,  
it is said, by his falling, when a child,  
on some edged tool; has a down look when  
spoken to, and is apt to be short and insol-  
ent in answering. The clothes he took with  
him are not recollected, except a red flannel  
shirt, a pair of Russia duck sailor's  
trousers, and a coarse wool hat with broad  
brim, nearly half worn. Having gone off  
without any provocation, it is probable his  
intention is to steer his course towards Bal-  
timore or Pennsylvania, and pass for a free-  
man. He has battled the same two fast  
seasons in Pomonkey, where he may have  
gone, or perhaps to Alexandria, where he is  
also a little acquainted. If taken 20 miles  
from home, or out of the county, I will give  
20 dollars for securing him in any goal, or  
if taken 50 miles from home, or out of the  
state, I will give the above reward of fifty  
dollars.

## Dr. Thomson's System of Chemistry.

IN FOUR VOLUMES OCTAVO. THE preceding edition of Dr. Thomson's Chemistry, had acquired so much reputation both in England and upon the continent of Europe, that a new edition, comprising the new facts with which the science had been enriched, and the new views of the subject which extended knowledge had suggested as indispensable, was eagerly looked for by the scientific world. A new edition has accordingly appeared, wherein the former edition of five volumes has been condensed into four.

All the new discoveries, and all the new theories of Chemical Phenomena, have been considered and embraced in the present improved edition: so that it is indispensable to the chemical student, as presenting the only condensed view of the changes and alterations in chemical doctrine, which the discoveries of the last ten years have suggested. No apology therefore can be necessary for reprinting such a book in this country; for the press does not furnish a substitute for it. But, there is so much theoretical suggestion—so much abstruse calculation—so much fact of dubious authority—and so much dubious validity—that notes and illustrations are absolutely necessary, not merely to render the book more useful, but more intelligible. Under these impressions, I thought fit to write notes in illustration (and sometimes in contradiction) of the work itself, rather than to make any abridgement of it. Those who wish to know the modern views of chemical science, must peruse it; and to very many who will be anxious to study it, elucidation will be necessary. I have endeavored to supply these, to the best of my ability; regardless whether my own opinions are in dissonance or coincidence with those of my author; leaving to the reader to decide between us.

The work will be published, with notes and illustrations, in four volumes 8vo. THOMAS COOPER, M. D. CONDITIONS. I. The work will be printed on a superlative paper, with a new small pica letter, and will be published early in the ensuing summer. II. It will be illustrated with a number of cuts, of which several have been necessarily added to the London edition. III. It will be delivered to subscribers at \$12—to non-subscribers at \$14, in boards. The London edition sells for \$18. JAMES KENNEDY & SON.

JAMES KENNEDY & SON, RESPECTFULLY inform the public that they have just received from LEE'S MEDICINE STORE, No. 46, Maiden lane, New-York, a fresh supply of the following valuable MEDICINES:

Hamilton's Worm destroying Lozenges, Which have within sixteen years past cured an immense number of persons of both sexes of every age and in every situation, of various dangerous complaints arising from WORMS, and from obstructions or foulness in the stomach and bowels.

This medicine bears no analogy whatever to others of similar titles so commonly complained of as operating with violence; on the contrary a particular excellence of this remedy is its being suited to every age and constitution. It contains nothing but what is perfectly innocent & is so mild in its operation that it cannot injure the most delicate pregnant lady or the tenderest infant of a week old should no worms exist in the body; but will without pain or griping cleanse the stomach and bowels of whatever is foul or offensive, and thereby prevent the production of worms and many fatal disorders. The lozenges are particularly efficacious in carrying off all gross humours and eruptions, feverish, and bilious complaints, and are the safest and mildest purgative that can be used on any occasion.

Description of Worms, and the symptoms by which they are known. Worms which infest the human body are chiefly of four kinds viz.—The Tape or large round worm; the Ascarides or small maw-worm; the Cucurbitine or short flat white worm; and lastly, the Tenia or tape-worm, so called from its resemblance to tape. This is often many yards long and is full of joints. It is most hurtful and most difficult to remove.

Among the symptoms attending worms are—disagreeable breath, especially in the morning; bad and corrupted gums; itching in the nose, and about the seat; convulsions, epileptic fits, and sometimes privation of speech; starting and grinding of the teeth in sleep; irregular appetite, sometimes loathing food and sometimes voracious; purging with slimy and fetid stools; vomiting; large and hard belly; pains and sickness at the stomach; pains in the head and thighs and lowness of spirits; slow fever with small and irregular pulse; a dry cough; excessive thirst; sometimes pale and unhealthy countenance, and sometimes the face bloated and flushed. Persons afflicted with any of the above symptoms should have immediate recourse to Hamilton's Worm Destroying Lozenges, which have been constantly attended with success in all complaints similar to those above described. A dose of this medicine given occasionally during the warm season, will effectually prevent "the vomiting and purging of children"—a dreadful disorder, which annually destroys thousands of the infant part of our citizens. It is likewise the mildest and most certain remedy known, and has restored to health and strength a great number when in an advanced stage of this fatal complaint. Particular and plain instructions are given for every part of the necessary treatment in such cases. Children generally take this medicine with eagerness; having a pleasing appearance, and an agreeable taste.

The Restorative Powder for the Teeth and Gums.

For the prevention and cure of BILIOUS AND MALIGNANT FEVERS is recommended HAHN'S ANTI-BILIOUS PILLS. THIS Medicine has been attended with a degree of success highly grateful to the inventor's feelings in several parts of the West Indies and in the Southern and Middle States, &c. The testimony of a number of persons can be adduced, who have reason to believe that a timely use of this salutary remedy has, under Providence, preserved their lives when in the most alarming circumstances. Facts of this conclusive nature speak more in favour of a medicine than conclusions of pompous eulogy founded on mere assertion. It is not indeed presumptuously proposed as an infallible cure, but the inventor has every possible reason that can result from extensive experience for believing that a dose of these Pills taken once in every two weeks during the prevalence of our bilious fevers, will prove an infallible preventive; and further, that in the earlier stages of those diseases their use will very generally succeed in restoring health, and frequently in cases esteemed desperate and beyond the power of common remedies. The operation of these pills is perfectly mild, so as to be used with safety by persons in every situation and of every age. They are excellently adapted to carry off superfluous bile and prevent its morbid secretions—to restore and amend the appetite—to produce a free perspiration and thereby prevent colds which are often fatal consequences. A dose never fails to remove a cold if taken on its first appearance: they are celebrated for removing habitual costiveness—sickness at the stomach and severe head-ache—and ought to be taken by all persons on a change of climate. They have been found remarkably efficacious in preventing and curing disorders attendant on long voyages, and should be procured and carefully preserved for use by every seaman.
